Once in a while, a product comes along that ‘redefines the meaning of excellence’.

That time is now.
The ‘Concept 20’ is a special loudspeaker which goes beyond anything that Q Acoustics has achieved before. It’s a beautifully styled product which we confidently believe delivers a level of sonic performance previously thought impossible at its price point.

To achieve this extraordinary performance, Q Acoustics’ design team applied scientific methodology and advances in technology to address the problem of cabinet resonance, long recognised as the single biggest hurdle preventing speaker designers delivering true ‘high end’ performance at a reasonable price.

The ‘Concept 20’ proves cabinet resonance need be a problem no longer.*

Incorporating a ‘cabinet within a cabinet’ design, its inner and outer enclosures are bound together by a bespoke adhesive which never quite sets. This configuration (known as Gelcore™ construction) allows

About Q Acoustics

Established in 2006, Q Acoustics has been a success from the very start. Its first products, the ‘1000 Series’ sent a seismic shock through the UK loudspeaker industry, received unprecedented praise from reviewers worldwide and scooped prestigious awards. More awards and international acclaim followed with the release of the upgraded ‘1000i Series’ and then again for the ‘2000’, ‘2000i’ and ‘7000 Series’ models.

In addition, not satisfied with merely designing remarkable conventional loudspeakers, Q Acoustics’ design team released ‘Q-TV2’; an ‘almost invisible’, technically advanced, amplified speaker system, which enhances the complete enjoyment of TV, movies and music in the home; all without intruding into precious living space.

Now Q Acoustics introduces the ‘Concept 20’, a new loudspeaker we confidently believe delivers a sonic performance previously thought impossible at its price.

Q Acoustics is proud to introduce the new Concept 20 Loudspeaker.

The ‘Concept 20’ is a special loudspeaker which goes beyond anything that Q Acoustics has achieved before. It’s a beautifully styled product which we confidently believe delivers a level of sonic performance previously thought impossible at its price point.”
the kinetic energy generated by the drive units within the cabinet to be dispersed as heat and preventing them colouring and degrading the speaker’s musical output.

Combine this new cabinet design with the Concept 20’s advanced, high dynamic, low distortion drive units and the result is a loudspeaker which, at its price, is nothing short of sensational.”

Sonically Matching Floorstand

To optimise sonic performance, we have also incorporated Gelcore™ Construction into a unique, visually striking and resonance-free matching floorstand for the new loudspeaker.

The beautiful Concept 20 speakers and high performance stands come in a choice of either Gloss White or Gloss Black, lacquered finishes.

“The ‘cabinet within a cabinet’ Gelcore™ construction dramatically reduces resonances and colouration.

“a scale and volume of sound that seems scarcely credible from such a small cabinet.”

“superb.”

“exceptionally clean, controlled and detailed.”

AV Forums, April 2013
**Concept 20 Speaker Specifications**

- Enclosure type: 2-way reflex
- Bass Unit: 125mm
- Treble Unit: 25mm
- Frequency Response: 64Hz - 22kHz
- Nominal Impedance: 6ohms
- Minimum Impedance: 4ohms
- Sensitivity: 88dB
- Recommended Power: 25 - 75w
- Crossover Frequency: 2.9kHz
- Recommended Power: 25 - 75w
- Dimensions H/D/W mm: 260 x 280 x 170
- Weight: 5.6kg

**Concept 20 Stand Specifications**

- Dimensions H/D/W mm: 655 x 386 x 240
- Weight: 12kg

**Concept 20 Finishes**

- Lacquered Black Gloss
- Lacquered White Gloss

*When compared to a good conventional cabinet, radiated power [colouration] throughout the critical mid-band (voice frequencies) reduces by an average of more than -6dB. In the high and low frequencies the effect is even greater, with improvements in excess of -10dB.*
