

The mother of all bass: **X38**

More sound volume, more detail, more high-end: The Excite X38 achieves a deep, powerful and vibrant sound quality, even in larger spaces.

The Excite flagship model X38 utilizes two 18cm diameter woofers featuring characteristic Dynaudio driver technologies, including: lightweight but rigid MSP cone membranes, extraordinarily large 75mm diameter aluminium voice coils with powerful center magnet systems, and high-strength die-cast aluminium frames.

That's how the X38 achieves its resounding bass, thrilling dynamics and incredible control. The midrange driver also utilizes MSP, thus ensuring a seamless integration with the woofers, while the tweeter's coated fabric dome guarantees the finest resolution and high frequency detail. With its meticulously selected crossover components and optimized dispersion characteristics, the X38 combines its energetic, dynamic presentation with a remarkably balanced, three-dimensional portrayal of the recording.

The extensively braced cabinet is available in a choice of fine natural wood veneer or satin lacquer finishes, while the removable cloth grille is discretely secured via concealed magnets. A notable feature is the integrated feet: depending on the flooring surface, the X38 can stand on four resonance-absorbing rubber feet or four height-adjustable spikes.
