

# Q Acoustics 3030i stereo speakers

Power. With Control.

3030i is the latest addition to the Award-winning Q Acoustics 3000i range. It's designed to deliver the biggest, most commanding sound ever achieved by a speaker of this type and price. Featuring a 165mm mid/bass driver developed from the powerful 3050i floorstander, along with an optimised motor, 3030i has bass extension and control superior to that of any nominal rival. Factor in the same tweeter and mounting as used in the 3050i, and 3030i redefines the scale and fidelity available from such a competitively priced standmounter.

- Class-leading engineering results in a sound of effortless poise and authority
- Capable of astonishingly low 46Hz bass response despite excellent 88dB sensitivity
- Innovative point-to-point cabinet bracing gives extraordinary rigidity and virtually eliminates distortion

ACOUSTICS

Q Acoustics' determination to extract unprecedented power and scale from a discreet, affordable standmounting speaker results in 3030i. Designed and specified without compromise, from the point-to-point bracing of its cabinet to the stability of its custom stand, 3030i is a speaker that's even greater than the sum of its already-impressive parts.

The evolution of the driver technology in the Award-winning 3050i floorstander results in seismic bass extension, smooth attack in the treble and a detailed, eloquent midrange. Softly elegant lines and exceptional build quality ensure 3030i looks as good as it sounds, in any of its four finishes. The bespoke stand provides both perfect stability and perfect positioning. These are a few of the things that make 3030i one of the best pound-for-pound speakers Q Acoustics has ever built.

### SPECIFICATIONS

<b>Enclosure type:</b>	2-way reflex
<b>Bass unit:</b>	165 mm (6.5 in)
<b>Treble unit:</b>	22 mm (0.9 in)
<b>Frequency response (+/-3 dB, -6 dB):</b>	46 Hz - 30 kHz
<b>Average impedance:</b>	6 Ω
<b>Minimum impedance:</b>	4 Ω
<b>Sensitivity (2.83v@1m):</b>	88 dB
<b>Stereo amplifier power:</b>	25 - 75 W
<b>AV receiver power (2 ch. driven):</b>	50 - 145 W
<b>Crossover frequency:</b>	2.4 kHz
<b>Effective volume:</b>	12.5 L (763 cu in)
<b>Enclosure dimensions (WxHxD): (inc. grille, terminal and feet)</b>	200 x 325 x 329 mm (7.9 x 12.8 x 13.0 in)
<b>Weight (per speaker):</b>	6.4 kg (14.1 lbs)
