

HUB-6 IR KIT

Infrared Repeater System

The Vanguard Dynamics IR Kit allows for control of audio video components in entertainment cabinets or equipment closets using existing IR remote controls.

The IR Kit comes with a sleek IR Receiver with visual feedback. Connect the IR Receiver to the connecting block to distribute an IR signal up to 12 entertainment devices.

Unlike many competing products each Vanguard Dynamics product is designed by us from the ground up. This allows us to carefully select the best value components and apply our engineering experience so that every product is the best possible performance and reliability. Of course we're backing that up our CLASS-LEADING WARRANTY.

KEY FEATURES

- **Excellent performance for the value**
- IR Hub with mounting bracket
- Designed to control up to 12 components
