

Debut RecordMaster (OM 10)

Audiophile turntable for Hifi & audio transfer to PC/Mac

- Precision belt drive with synchronous motor
- Electronic speed control with 33/45 rpm (78) speed change, which acts as "Speed Box" with ultimate speed stability
- 8,6" aluminium tonearm
- Steel platter weighing 1,3 kg with a felt mat
- Built in MM phono preamplifier with USB out
- Simultaneously connection with amplifier & PC/Mac
- OM 10 moving-magnet cartridge fitted
- Available in 3 high-gloss finishes (piano-black, red or white) and walnut matt

Speed	33, 45 (electronic speed change) 78 (manual)
Drive principle	belt drive
Platter	300mm steel with a felt mat
Speed drift	33: $\pm 0,60\%$ 45: $\pm 0,50\%$
Wow & flutter	33: $\pm 0,19\%$ 45: $\pm 0,17\%$
Mains bearing	stainless-steel axle in a brass bearing housing
Tonearm	8,6", aluminium
Effective arm length	218,5 mm
Overhang	18,5mm
Tracking force	10 - 30mN
A/D conversion	16bit Delta Sigma
Sampling frequency	up to 48kHz
Output	RCA & USB-B (USB 1.1)
Included accessories	15 volts DC power supply, dust cover
Power connection	110/120 or 230/240 Volt - 50 or 60 Hz
Dimensions	415 x 118 x 320mm (WxHxD)
Weight	5 kg net

AD-converter with USB output

electronic speed change

The best-buy turntable classic with aluminium tonearm, computer connection, 3 speeds and DC power supply!

The first Debut turntable, introduced in the late 1990s, was a revolution for the hi-fi industry. For the first time after the arrival of Compact Disc and the assumed demise of vinyl records, an analogue product re-emerged in the "mass market" – something all music lovers could afford.

The new *Debut RecordMaster* has been designed to set new standards in this category for the coming decade – perfectly timed as analogue today is again a respected source, while the demand for good turntables with all speeds is growing fast!

It comes with improvements like an increase in platter size and weight to realize even smoother rotation, the overall sound quality is greatly improved. The approved belt drive design offers low noise AC motor with effective motor decoupling (utilising TPE), ultra precision frequency DC-driven AC generator for ultimate speed stability. Ultimate convenience is achieved, because of electronic speed change („Speed Box“) and the possibility of playing 78rpm.

A simple exchange of stylus to OM78 (not included) and a drive belt turnover to larger diameter of pulley is required, that's all!

Because *Debut RecordMaster* comes with pre-mounted cartridge and built-in phono preamplifier with USB output, connection to both line-level input of your hifi system and recording of vinyl to PC/Mac easily can be done simultaneously!

Debut RecordMaster is offered in high-gloss black, red, green, blue, yellow, light-grey, white, purple and walnut matt.
