

# twenty5 22

The more substantial standmount in the **twenty5** range is a force to be reckoned with. The larger, potent **g-weave** bass driver, together with the new **Laminair** vent and an **ATL** of surprising length given the cabinet dimensions: all combine to give the **twenty5.22** bass weight, punch and dynamics that are unmatched in its class.

The **twenty5.22** is not only made for music's visceral qualities, it is equally capable when it comes to resolving the fine details that produce realistic and finely nuanced performances of the utmost delicacy.

Choosing the right twenty5 model for your room size

## twenty5
