Extremely capable wet cleaning machine that removes dirt and dust from your valuable records

VC-S is a radical new development. There are features which are new for record cleaning machines in this pricerange:

- It is **super powerful** and cleans a record in 1 max 2 rotations (best is 1 turn forward, 1 turn backward)
- It turns the record **superfast** within 2 seconds per rotation, which is about 3 times faster than usual cleaning machines do. The result is a much faster cleaning of records as well as much cleaner and 100% dry records with NO residual humidity!
- A **new type of clamp** seals the record label from cleaning fluid and avoids damage on the label!!
- **Robust metal arm**, which is easy to use, mechanically stable fixing! (no springs)
- **Big container** (2,5 l) for used fluid, that shows fill-up capacity and guarantees no spoil around of used cleaning fluid. Discharging of used fluid is extremely easy to do.
- Newly developed eco-friendly **record cleaning concentrate Wash it** offers very good cleaning results and reduces static charge, so record wear as well as stylus wear is significantly reduced.

***Attention: Wash it** is optimized for cleaning both standard vinyl records and 78 rpm shellacs — see separate product information. With our **VC-S** you will be able to listen to your records after a few seconds and experience a completely new level of sound!
